Whitehead's Broadbill

@Jakapat Vanichanan

Jak joined one of the birding tours in Sarawak 02 years ago, he was happy with the tour as he got one of his "wanted bird" in his world list ~ the **Hose's Broadbill**, and also he enjoyed very much to see endemic species like **Dulit Frogmouth**, **Bornean Frogmouth**, **Black Oriole**, **Blue-banded Pitta**, **Bornean Banded Pitta**, **Whitehead's Spiderhunter**, **Mountain Serpent Eagle**, **Pygmy Heleia**, **Bornean Barbet**, **Mountain Barbet**, **Bornean Bulbul**, **Bornean Leafbird**, **Bornean Spiderhunter** and others.. He decided to revisit Borneo this year and his aim was to see/photograph as many endemic as he can in one week's time, so Kinabalu Park definitely is the right place to go even though he had birded in this Park in 2007 by himself. The main targets for him were **Whitehead's Broadbill** and **Whitehead's Trogon**, follow by the **Fruithunter**, **Bare-headed Laughingthrush**, **Everett's Thrush**, **Mountain Wren-babbler**, **Bornean Stubtail**, **Bornean Green Magpie**, **Red-breasted Partridge**, **Crimson-headed Partridge** and also other common endemic & resident birds. Good enough, we saw over 100 species in one week's time which includes 40 lifers for him, and also picked up all of the possible endemic species that he wanted to see in Kinabalu Park, along with few night birds like Sunda Frogmouth, Reddish Scops Owl, Sunda Scops Owl and Mountain Scops Owl during the trip..

(Next, Jak decided to join a 14 days 13 nights Sabah birding tour in year 2022 which includes Kinabatangan River and Danum Valley for more endemic, look forward to serving him again soon.)
